## SKILLS

Java,  JavaScript, HTML/CSS, React, MySql

## EXPERIENCE

### Varuna Marine Services BV, Amsterdam – *Software Intern*

SEP 2023 - PRESENT

Working on the development of an AWS serverless web application that exposes RESTful APIs for CRUD operations, performs data validation using Joi library and uses AWS DynamoDB for storage. Postman testing tool is used for API testing.

## EDUCATION

### Bachelors of Technology (Computer Science)

2017 - 2021

Bhagwant Institution of Technology, Barshi, India

## PROJECTS

### Online Food Ordering App

This is  an online food ordering application with sign up, sign in, browse food items  and cart functionality. Front end has been developed using React and Material UI components. Back end is built using Express and the MongoDB database.

### Weather App

A simple weather application which lets the users get the weather of any city across the globe based on the provided city name. This application has been built using ReactJS and makes use of OpenWeather APIs.
